## Spring Clean Up Time!

Pollen, daffodils, and dirty boats; what a great reminder that the sailing season is upon us! If you are like me you have started thinking about getting back to the club to share the open lake, food, and rocking chairs with your friends. **Saturday April 17<sup>th</sup>** will kick off our season with the annual **Spring Clean Up day**. We will start at 9:00am with plenty of odd jobs to go around. If you can operate a broom or garden hose, you are qualified! We will have the tools but need your manpower. This year we may need to move some boats to level holes, reseed areas, and

treat for the ever invasive ants. Boats that were not launched last year will be relocated to the back lot to free up space for boats that are being sailed.

The workday will be followed by a hotdog cook out and great fellowship. Don't miss this opportunity to shape up the club for another great season.

### **Need Advice for Repairs, Help raising a mast or pumping up a tire?**

Saturday after clean up we will have spare tires for loan, an air compressor, jacks, and plenty of manpower to help anyone in need. Expert advice

on maintained and rigging is available (please ask selectively, some are more expert than others)

## New Web Page

For years US Sailing has hosted our web page along with other clubs nationwide until recently when this service was terminated. Guy Statt, our webmaster has secured waccamawsailing.com as our new homepage. If you

use Google or any other search engine you may have to scroll thru pages previously listed but no longer supported. Be sure to go to [www.waccamawsailing.com](http://www.waccamawsailing.com) for the latest on WSC.

We will be moving all forms,

applications, and post for WSC to this site. Thank you Guy for all of your hard work to give our page a new face last year and your current work to transition WSC to this new server and page.

# Plans

2012 promises to be another great year for WSC. Your Board is moving ahead to section the back lot and offer boat parking for non members. An annual fee will be charged and no club privileges will be included. This will offer the club a way to expand its revenue base with a minimum capital outlay.

Last year the club received rolls of fire hose and plans were made to install an additional rub rail below the pier deck. This will help prevent damage to dinghies especially when the water is low. We also intend to power wash the pavilion building and stain it along with the kitchen/bathroom building we washed last year.

Since these will be wet jobs we will schedule another work day later in the season when the weather has warmed up.

# 2011 Highlights

2011 was a great year for Waccamaw Sailing Club. We were able to re-deck the pontoon boat to extend its life as the committee boat. Fencing was added to the back storage lot to make it more secure as well as old abandoned boats were removed.

WSC hosted the Isotope Class for its National Championship as well as the Tanzer Class for its State Championship. Both Classes intend to join us again this year for Indian Summer.

Lana Dial donated a Hobbie 16 to the club which will be offered for sell this year

after we clean her up.
